EXPERIENCE

Shopify

Remote (Ottawa, Canada)

March 2021 - Present

Senior Software Engineer

- Contributed to implementing local currency billing at Shopify and led the integration of the UPI payment method, enabling the collection of approximately \$12M in pending bills from merchants in India.
- Led the implementation of tax jurisdictions for Shopify's billing system, enabling accurate tax collection across multiple countries and saving the company approximately \$5M in tax liabilities.
- \circ Led the migration of a 20+ TB archival database from MySQL to BigQuery, implementing a data replication layer which enabled $\sim 10x$ faster financial reconciliation analysis while eliminating MySQL maintenance costs.
- \circ Improved the logic for importing financial documents into Netsuite, increasing throughput by 1.5x and reducing timeout errors, thus enabling the Shopify finance team to expedite month-end closures.

Hiver Bengaluru, India

Senior Software Engineer

May 2019 - Feb 2021

- Conceptualized and developed an internal Gmail emulator to test shared inbox logic, enabling comprehensive end-to-end integration testing which reduced production errors by nearly 50%.
- Developed an internal tool to track email journey paths in shared inboxes, significantly reducing support and developer debugging time for issue identification.

Datalicious Bengaluru, India

Full Stack Engineer

June 2017 - April 2019

- Built a dashboard using React, D3, and Flask to enhance insights into customer journeys, including feature planning, story grooming, and task management.
- Developed a service to aggregate data from ad-marketing platforms and export it to a data warehouse for streamlined post-processing.
- Maintained a system for third-party tracking, analysis, and reporting of customer interactions.

Loktra

Full Stack Engineer

Bengaluru, India

Dec 2016 - May 2017

- Led the implementation of a data pipeline to collect and clean coordinates, creating paths to visualize user journeys.
- Created a horizontal scale database system to collect location coordinates from GPS devices.

AppPerfect Udaipur, India

Software Engineer

Feb 2016 - Nov 2016

• Responsible for developing and implementing new features for Load testing and Web testing tools.
